Arizona's Education Transformation

Paving the way to excellence!

Agenda

- AELAS
  - Background
  - Components
- ADEConnect
- AZDash
  - Information
  - Demo

What we've heard: SAIS

- The state data system is an unnecessary burden to LEAs
  - 2,000,000 + SAIS errors cost LEAs **$20,000,000** or more every year to fix
  - 170 applications and utilities that don't share information
  - Approximately 250 (+) data requests from ADE/year

What we have heard: Transfers

- School records **do not** transfer immediately

- Records may take **days or weeks** to transfer (if at all)

- Administrators lack **information** on the child's needs and teachers lack the **tools** to best teach him/her

- ADE's delayed transfer causes the child to **fall behind**

- District has to reevaluate the child, wasting **time and resources**

❌The lack of real-time data can put children further behind *every time* they change schools.

Department of Education

What we've heard:
# Licenses, maintenance, fees. Oh my!

- Arizona's districts and charters spend up to $281,000,000 every year on software maintenance and licensing fees
  - **$155,000,000** spent annually just local district software licenses
  - No competitive pressure on vendors for better pricing and service
 - Different vendors for different systems, none of which share information

**Arizona is not getting the best bang for its technology buck**
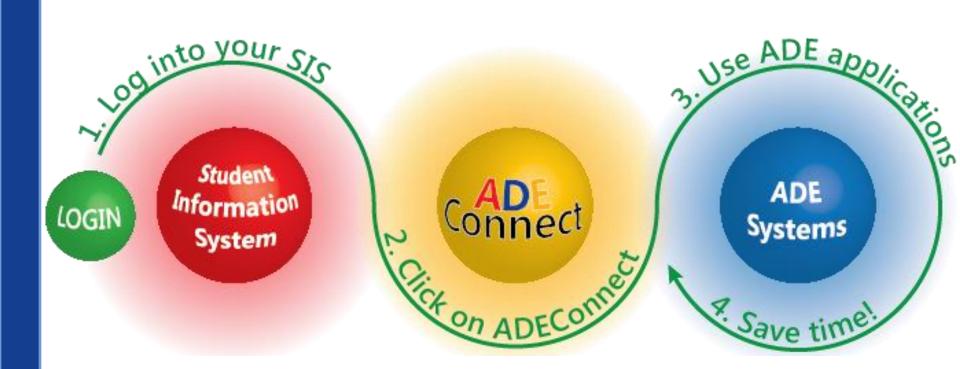

THE AELAS SOLUTION

AELAS-A comprehensive and integrated learning and accountability system

ADEConnect

ADEConnect

- Secure single sign-on application managed through SIS by LEA

- Empowers LEA to display desired information to the right individual

- Reporting feature that allows analytics of LEA usage

- Eventually replaces Common Logon
  - https://home.azed.gov/Portal/

Arizona Dashboards (AZ Dash)

AZDash
Accelerating Student Achievement

Data at your fingertips that you can use in the classroom and for resource planning at the school and district level
